

## **Ways the Workshop can develop leadership:**

### **◇ Build self-confidence and wisdom**

The workshop teaches the essential skills and techniques needed to address challenges from a different perspective. These skills and techniques can add clarity to a difficult situation and promote wisdom and facilitate self-confidence.

### **◇ Empower you to succeed**

If you think great leaders are born and not made, think again. The workshop uses various techniques and examples to emphasize the point that with a little hard work we all have it in us to be great leaders.

### **◇ Teach valuable skills**

The workshop can teach you the skills you need to lead effectively, including the skills needed to persuade and influence people—even those over whom you have little direct authority.

### **◇ Encourage introspection**

Before you get started, training courses typically test you to find out where you need development. Only after realizing these areas can you begin to improve your skills. You'll have the opportunity to get to know yourself a little better by exploring your motivation to lead, and to test your level of self-confidence, your emotional intelligence, and other qualities that are needed to become a great leader.
